1. A Soviet munitions depot is located in the area of the former Junyady János Mineral Water Company in Budapest. The munitions depot, which is surrounded by a three-meter high barbed wire entanglement, has a connection with the Budapest-Kelenföld-Győr railroad line. The munitions are always brought to the depot by rail and consist of 50, 100, and 250 kg. bombs as well as weapons for aircraft and fliers. The munitions are stored in barn-like wooden buildings, barracks and reinforced cement underground bunkers. The bunkers have walls 40 cm. thick, are 10 x 15 m. large and 2.50 m. high. There are 13 such bunkers which were built in the spring of 1953.
2. The area, which has been closed off by the Russians, is guarded by about 100 men who wear light blue shoulder boards. They have the task of unloading the trains which they perform only at night.

Annex: Sketch-map of the Soviet munitions depot in Budapest (1 page).
